- Focus on customer and shareholder success and compete to win.
- Drive innovation and results by understanding the market and its opportunities.
- Create safe and health-conscious work environments, require compliance and embrace environmental stewardship

A Brief History Of The Business

KEL Chemicals Limited is a manufacturer of various chemical products located in the industrial area of Thika town in Kiambu County, Kenya.

KEL Chemicals Limited is committed to the manufacture of quality as well as affordable products and is proud holders of the KEBs Diamond Mark of Quality.

KEL Chemicals Limited has been in production since 1977 and are the oldest and largest manufacturer of Single Superphosphate Fertilizer and Sulphuric Acid in the East and Central African region.

We are an organization committed to the values of responsibility, sustainability and transparency.

Our products are supplied throughout the Eastern African region, including the following countries: Kenya, Tanzania, Uganda, Democratic Rep. Congo, Rwanda, Burundi, and Ethiopia.

KEL Chemicals Limited which has recently been acquired by Dawa Group of Companies, focuses on growth in both product diversification and further market penetration using the existing trade networks of the group.

Our Operating Principles: *How we work*

- To operate in compliance with the law and adhere to high ethical standards.
- To assess the impact on customers and society when making decisions.
